Special Commission of Inquiry Acute Care Services in NSW Public Hospitals

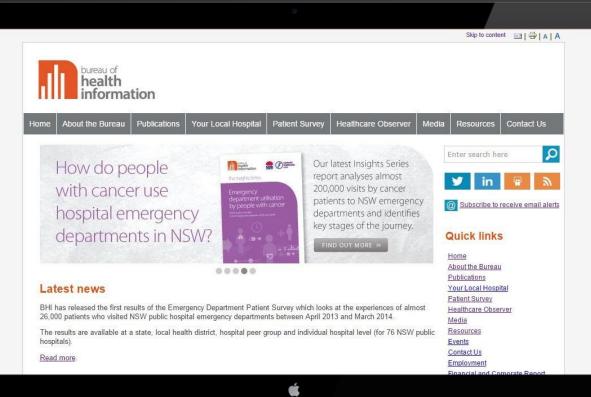

Final Report of the Special Commission of Inquiry

Acute Care Services in NSW Public Hospitals

Overview

Peter Garling SC 27 November 2008

<sup>66</sup> The public reporting of information about the health system and hospital performance is essential for the future of NSW Health.

It is the single most important driver (or lever) for the creation of public confidence in the health system, engagement of clinicians, improvement and enhancement of clinical practice and cost efficiency.

**Garling Report**

#### Health report shows consistent turnaround improvement

BHI chief executive Dr Jeanfrom October to December.

ment was the shortest recorded for any October to December quarter "Despite more patients visiting

port shows patients are spending less time in the emergency depart-ment overall," Dr Levesque said. That was true at the individual hospitals throughout the Illawarra

tients in the Illawarra are receiv At Wollongong Hospital, 71 per cent of patients left the ED within four hours in the December quarter, compared with 66 per cent in the previous quarter.

Seventy per cent of those presenting to Shellharbour Hosnital ED left within the timeframe

in October to December, as opposed to the 65 per cent of patients doing so from July to September. At Shoalhaven Hospital the figure for the latest quarter was 61 per cent, compared with 59 per cent in the September quarter

"Under Labor in 2010, just 47 per cent of patients were leaving the emergency department at Wollongong Hospital in four hours - it is now 71 per cent," NSW Health Minister Jillian Skinner

"This is a remarkable improvement, mirrored by many local hospitals, which demonstrates pa-

ing best care under the Baird government "It is fantastic to see hospitals like Wollongong making this progress now as the improvements will only continue when the \$106 million redevelopment of the

There were more than 54,000 elective surgeries performed across NSW in the past quarter, with 97 per cent on time

hospital is complete.

The report found that over-

### Long wait for improvement

### Hospitals lifting emergency reponse

#### MATT BAMFORD

WAITING times for serious cases in emergency departments can be up to three times longer in some Sydney hospitals than others, a quarterly performance review to be released today reveals.

The Bureau of Health Information found the state's most efficient hospital for category 2 cases from arrival at emergency to treatment was St Vincent's in Darlinghurst with an average of just four minutes.

Comparatively, the same category emergency patients in the Shire can wait up to 13 minutes for urgent treatment at Sutherland Hospital.

Category 2 patients are classed on the Australasian Triage Scale as those with imminently life-threatening in-

juries, in severe pain or needing time-critical treatment such as chest pain. severe burns or psychotic behaviour. Category 2 patients should begin treatment within 10 minutes of presenting at emergency departments.

all, between April and June this year, more than 600,000 patients attended emergency departments - a 3 per cent rise on the same period last year and the highest recorded

for the quarter in two years. Of those, more than 168,000 were admitted to emergency, a 5 per cent increase on the same time last year.

The report showed the states's public hospitals were doing better across the board. with 72 per cent of patients leaving emergency departments within four hours - a

6 per cent improvement from April to June 2013.

Bureau of Health Information chief executive Dr Jean-Frederic Levesque said for those patients with more common injuries, like sprained ankles, waiting times had dropped across the state.

"There has been improvements for triage categories four and five, for whole of NSW, Category five has gone from 147 minutes (average wait) a year ago down to 133 minutes," Dr Levesque said.

Waiting times for elective surgery were on target, with 97 per cent of patients receiving surgery within the recommended time period and every patient needing urgent surgery receiving it on time.

"Hospitals have improved against most performance measures," Dr Levesque said.

LISA WACHSMUTH

PATIENTS have had shorter waiting times at hospital emergency departments across the Illawarra and Shoalhaven in the past quarter, according to new figures. Almost 40,000 people visited EDs across the health district from October to December 2014 with 71 per cent leaving within four hours, according to the Bureau of Health Information's (BHI) Hos-

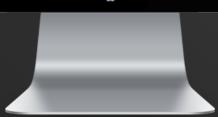

pital Quarterly Report. That figure is an improvement on the September quarter, when 67 per cent of people left the district's EDs within the four-hour benchmark

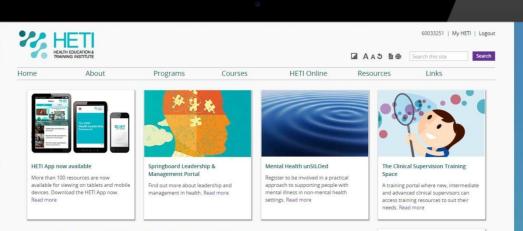

Frederic Levesque said more than 636.000 people visited emergency departments throughout NSW He said the total time natients spent in the emergency depart-

over the past five years. emergency departments, the re-

# Example graphs illustrating time trends in the percentage of most positive responses, NSW and LHDs with significant trends

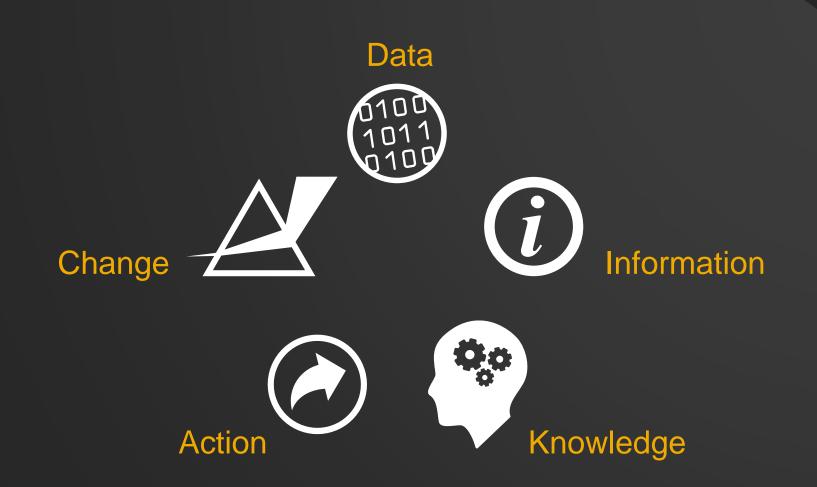

If you needed assistance, were you able to get a member of staff to help you within a reasonable timeframe?

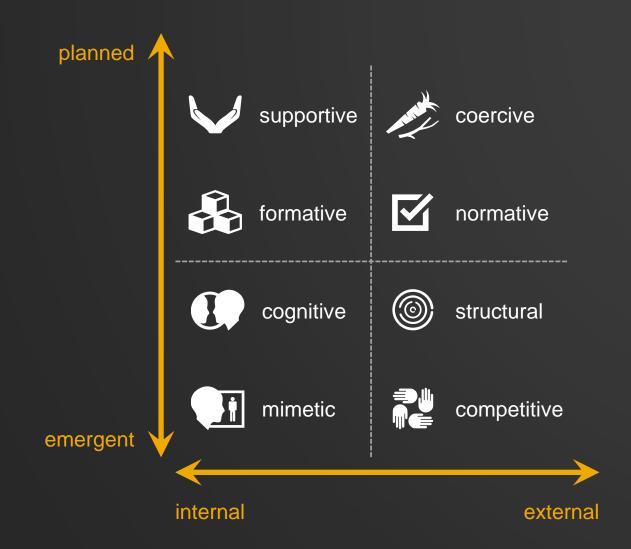

# **Concluding remarks**

Multiple organisations can create confusion and impose burdens on stakeholders

No organisation can use all levers all the time...some levers are synergistic, some are in tension Splitting and overlapping responsibilities enable emulation, competition and diversity and brings resilience

# Thank you! Merci!
