

Health Quality Conversations

How does Health Quality Ontario (HQO) help health care providers improve the quality of health care in Ontario?

“Hello. My name is Dr. Joshua Tepper. I’m the President and CEO of Health Quality Ontario, and I’m a family doctor here in Toronto.

One of the most exciting things about being a health care provider is the amount of change that happens. Change in the technology we use, the opportunities to improve people, the knowledge we have about illnesses and their treatments.

It’s also pretty daunting. It’s daunting to face that deluge of change – the fact that even just something we thought was true two years ago might not be today.

And so each day, Health Quality Ontario works to provide literally tens of thousands of health care providers in the system with guidance about what works and what doesn’t around new technology and the new information that’s coming at us.
